## ABOUT ME

Computer Science undergraduate at Bina Nusantara University with a strong interest in AI/ML and software development. Experienced in data preprocessing, model training, and evaluation across computer vision, NLP, and speech processing. Familiar with front-end and back-end web development through hands-on projects. Seeking an AI/ML or Software Development internship to apply technical skills and contribute to real-world projects.

## EDUCATION

**Universitas Bina Nusantara** - *Bachelor of Computer Science* **Sep 2024 - Feb 2028 (expected)**

- GPA : 3.38/4.00
- Relevant Courses: Machine Learning, Artificial Intelligence, Deep Learning, Natural Language Processing, Computer Vision, Speech Recognition, Software Engineering.

## PROJECTS

**SmartDemand |** *Python, Pandas, scikit-learn,Numpy - Team of 5* **Feb 2026 - Jun 2026**

*A* sales volume prediction system for e-commerce categories using ensemble machine learning with an interactive web-based forecasting dashboard.

- Built an end-to-end data pipeline, cleaning e-commerce data and re-aggregating from product to category level, improving Random Forest test $R^2$ from 0.50 to 0.89, with time-based validation to prevent data leakage.

**Tutorin |** *mySQL - Team of 5* **Dec 2025 – Mar 2026**

A peer tutoring platform connecting students with mentors for 1-on-1 online sessions

- Designed and structured a MySQL relational database with 15 tables, 21 foreign keys, and 13 indexes to manage users, mentors, bookings, payments, reviews, and wallets.

**SSS+Dealer** | *Node.js, Express.js, HTML, CSS, Vanilla JS - team of 3* **Feb 2026 - Apr 2026**

A full-stack luxury car dealership platform for browsing, comparing, and booking test drives

- Built 6 frontend features: car browsing, filtering, details, favorites, comparisons, and test-drive booking.
- Developed REST APIs for 4 modules: car data, favorites, comparisons, and test-drive bookings.

**Uniform Attribute Detection** | *Python, OpenCV, scikit-image, scikit-learn, Jupyter - Team of 5* **Feb 2026 - Jun 2026**

A real-time webcam system that detects school uniform attributes using HOG features and an SVM classifier.

- Developed an image preprocessing and HOG feature extraction pipeline with CLAHE normalization.
- Implemented 5× data augmentation and Pascal VOC dataset preparation with background sampling.

**ToxiCheck** | *Python, pandas, Numpy, Scikit-learn - team of 3* **Feb 2026 - Jun 2026**

An NLP-based application for classifying Indonesian text as hate speech, abusive, or neutral.

- Trained and tuned four ML models (SVM, Logistic Regression, Naive Bayes, and KNN) using GridSearchCV and 5-fold cross-validation.
- Evaluated model performance, achieving 81.9% accuracy and 0.79 macro F1-score with Logistic Regression.

## ORGANIZATIONAL EXPERIENCE

**Bina Nusantara Computer Club (BNCC)** - *Human Resources Development Activist* **Oct 2025 - Sep 2026**

- Contributed to internal seminars for 50+ members through module preparation and event execution, and helped organize bonding activities to strengthen team collaboration.
- Organized regular bonding activities to strengthen collaboration among division members.

## SKILLS

**Technical Skills :**

- Programming Languages : Python, C , JavaScript, Java
- AI / Machine Learning : Scikit-Learn, Pandas , Numpy
- Web Development : HTML, CSS ,JavaScript
- Backend Development : Node.js, Express.js
- Database & Tools: MySQL, GitHub, Google Colab

**Soft Skills :**Problem-Solving, Teamwork & Collaboration,Adaptability & Continuous Learning

**Languages** : Indonesian (Native), English (Professional Working Proficiency)
